

5 mẫu thuyết trình tiếng Anh thực tế và ấn tượng

Topic 1: Family

Thuyết trình mẫu:

Good morning everyone, my name is [Your Name], and I'm very happy to have the chance to talk about one of the most important topics in life – my family. I believe that the family is the foundation of our lives, the place where we learn love, respect, and how to deal with challenges.

Let's start with my mother. She's the heart of our family. Like most mothers, she is loving, caring, and always concerned about her children's well-being. But, she is also very strict when it comes to discipline. She has a strong artistic nature and often finds herself creating something, whether it's painting or crafting. My mother is extremely innovative in the kitchen as well. She loves cooking and always comes up with new recipes. My mother is the one who holds us together and motivates us to always strive for our best. Without her, our family wouldn't function as smoothly as it does today.

Now, moving on to my father. He is the backbone of our family, both literally and metaphorically. My father is the one who makes all the important decisions, but he also knows when to listen and be flexible. He is responsible for everything from fixing things around the house to taking care of the family's finances. He has a passion for gardening and spends hours planting new flowers and vegetables. His hands are always covered in soil, and we like to say that he has 'green fingers.' He's the one who teaches us the importance of responsibility and hard work.

Finally, let me tell you about my little sister. As the youngest in the family, she's often the center of attention. She has an angelic smile that can brighten anyone's day. Like our mother, she loves art and crafts and can spend hours working on little projects. Although she's mischievous at times, filling our home with her laughter and little moments of mischief, she brings joy and warmth to all of us. Despite her playful nature, she's very thoughtful and always tries to help out when she can.

In conclusion, I am very lucky to have such a loving and supportive family. They have shaped who I am today, and I am forever grateful for them. Thank you for listening.

Topic 2: Success

Thuyết trình mẫu:

Respected Principal, Respected Professors, and Dear Fellow Students, today is a special day. Not only are we here to celebrate the annual event, but we are also celebrating the success of all the students who have worked hard throughout the year. I am honored to stand before you and share my thoughts on success.

What is success? For some, it may mean getting good grades or winning a competition. For others, it may mean securing a job or buying a car. But for me, success is much more than that.

Success is not only about achieving material goals; it is about finding happiness and fulfillment in life.

Throughout my life, I have realized that success is not something that can be measured by just one standard. It is different for each person. Some may define success through financial achievement, while others may find it in their relationships or personal growth. Success is about setting your own goals and working tirelessly towards them, even if it takes time and patience.”

I believe that failure is also a part of success. It teaches us valuable lessons and helps us grow stronger. It is through failure that we learn to persevere, adapt, and ultimately succeed. Life is not about avoiding failure, but about overcoming it.

In conclusion, my message to you is to define success for yourself. Don't let society or others tell you what success should look like. Follow your passion, stay committed, and remember that true success is found in the journey, not just the destination.

Topic 3: Unemployment

Thuyết trình mẫu:

Respected Managers and Dear Colleagues, today I want to address a serious issue that is affecting many of us in the current economic climate – unemployment. As you know, the economy is struggling, and many industries are facing tough times. This has led to the unfortunate reality of job cuts and layoffs across the country.

Unemployment is a pressing issue that affects millions of people worldwide. But we must not be discouraged. We must rise above these challenges and find new opportunities. It is important to remember that unemployment is not the end of the road, but rather a stepping stone to something better.

There are many ways we can approach the problem of unemployment. One of the best ways is through self-employment. With the rise of the gig economy and digital platforms, there are more opportunities than ever to start our own businesses or work freelance. It may not be easy, but with hard work, persistence, and innovation, we can overcome the obstacles in front of us.”

“In conclusion, I encourage you to stay positive, keep looking for new opportunities, and don't give up. The road to success may not be easy, but it's worth the effort. Together, we can make a difference and create a future where unemployment is no longer a major concern.

Topic 4: Environmental Awareness

Thuyết trình mẫu:

Good afternoon, respected teachers and dear friends! Today, I would like to talk to you about one of the most critical issues of our time – environmental awareness. As we all know, our planet is facing numerous environmental challenges such as climate change, deforestation,

pollution, and loss of biodiversity. These issues are not only affecting the natural world but also the well-being of humanity.

The first and foremost step towards environmental conservation is awareness. Many people still don't realize the extent of the damage we're causing to our planet. For example, plastic pollution has reached alarming levels, with millions of tons of plastic waste entering our oceans every year. This plastic doesn't just affect marine life; it eventually makes its way into our food chain.

But awareness alone is not enough. We must take action. One small change, like reducing our use of plastic, can make a significant difference. Simple actions like recycling, using energy-efficient appliances, and conserving water can go a long way in protecting our environment. Moreover, it's crucial to educate others about the importance of environmental protection and encourage sustainable practices.

In conclusion, the future of our planet depends on the choices we make today. If we continue to ignore the environmental challenges, we are putting future generations at risk. But if we act now, we can create a cleaner, healthier world. Let's work together to make a positive impact on the environment. Thank you!

Topic 5: Technology and Innovation

Thuyết trình mẫu:

Good morning, respected guests, faculty, and fellow students. Today, I am going to talk about the role of technology and innovation in shaping the future. Technology is advancing at an unprecedented rate, and it's hard to imagine our lives without it. From smartphones to artificial intelligence, technology is transforming every aspect of our lives."

One of the most significant areas where technology has had an impact is in communication. In the past, we relied on face-to-face meetings, letters, or telephones to communicate. Today, we can connect with anyone around the world instantly through video calls, social media, or messaging apps. This has revolutionized the way we interact, do business, and even learn.

However, while technology has brought about many positive changes, it also comes with its challenges. The rise of automation and artificial intelligence is changing the workforce, and many jobs are being replaced by machines. This creates both opportunities and challenges for workers, who must adapt to new skills and industries.

Innovation is another key aspect of technology. From renewable energy solutions to medical breakthroughs, innovation has the potential to solve some of the world's most pressing problems. For example, electric vehicles are helping to reduce our carbon footprint, and advancements in healthcare are enabling us to cure diseases that were once thought incurable.

In conclusion, technology and innovation are powerful forces that will continue to shape our future. As we move forward, it's essential that we embrace these changes, but also remain

mindful of the challenges they bring. The future is exciting, and it's up to us to use technology responsibly and innovatively to create a better world. Thank you!
